

Tuesday, December 5th 1:00 – 2:00 PM
Substance Use and Addiction Panel

WHO:

Under the Mental Health Project Group, the Vaping Education and Student Health Initiative (VESHI).

Members working on this panel:

Senators Issa Hosari, Hassan Ezzeddine, Sheva Khaimov & Non-Senator Annemarie Whorf

WHAT:

The goal of this panel is to discuss substance use and addiction in a contextual manner; how addiction may come about, risk factors and populations affected, as well as what the current research in the field is working on (treatments, medications, etc.). Panel participants will be professors and researchers in the field, as well as therapists with experience in this field of cognitive therapy and the resources on campus. Snacks and refreshments will be available for attendees.

WHY:

This would be the second panel held by the MHPG, with this one sourcing from the VESHI initiative. Addiction, especially in the form of vaping, has grown in prevalence within college-age individuals. This panel aims to inform attendees about the psychological factors that are at play during addiction and highlight the research and resources available at Wayne State.

WHEN:

Student Center Hilberry B

The panel will take place on Tuesday, December 5th from 1:00 –2:00 PM.

NEED HELP?

Is there something other senators need to help with like volunteers?
